## Exercise 3.8 Symmetry of $R_{ab}$ alternative solution

This differs from the previous code by the inclusion of a call to `canonicalise` immediately after the first two substitutions and a declaration that  $\Gamma^a_{bc}$  is symmetric in  $bc$ . This pair of changes produces a more compact set of results than given above. Incidentally, this also shows that  $\partial_a \Gamma^c_{bc} = \partial_b \Gamma^c_{ac}$ .
