## Exercise 2.5 Combining rules – a solution

```
\{a,b,c,d,e,f,g,h,i,j,k,l,m,n,o,p,q,r,s,t,u\#\}::Indices(position=independent).
     \nabla{#}::Derivative.
     \partial{#}::PartialDerivative.
     # rules for covariant derivatives of v
     deriv1 := \nabla_{a}{v^{b}} \rightarrow \partial_{a}{v^{b}}
                                   + \Gamma^{b}_{d a} v^{d}.
10
     deriv2 := \\ a_{a}{\alpha_{b}}(v^{c}) -> \\ a_{a}{\alpha_{b}}(v^{c})
11
                                               + \Gamma^{c}_{d a} \nabla_{b}{v^{d}}
12
                                               - \Gamma^{d}_{b a} \nabla_{d}{v^{c}}.
13
14
     # second covariant derivative of v
15
16
     expr := v^{c}_{b a} -> \lambda_{a}{\alpha_{b}^{c}}. # cdb (ex-0205.101, expr)
17
     save := @(expr).
18
19
     # apply the rules, then simplify
20
21
                    (expr,deriv2)
     substitute
                                         # cdb (ex-0205.102,expr)
22
                    (expr,deriv1)
                                         # cdb (ex-0205.103,expr)
     substitute
                                         # cdb (ex-0205.104,expr)
     distribute
                    (expr)
     product_rule
                    (expr)
                                         # cdb (ex-0205.105,expr)
25
                    (expr)
                                         # cdb (ex-0205.107,expr)
     canonicalise
26
                    (expr,save)
                                         # cdb (ex-0205.108,expr)
     substitute
27
```

The trick here is to introduce in line 17 a dummy left hand side, v^{c}{}\_{b a}, that is invisible with respect to the substitution rules of lines 8 and 11. Thus lines 22 and 23 will only target the right hand side of expr.

Notice how a copy of the initial expression is made in 18. This is used later in line 27 to replace the dummy object  $v^{c}_{ba}$  with  $\align*_{a}_{b}_{v^{c}}$  but this time acting on the left hand side of the rule. The result is a rule for second covariant deriavtives.

$$v^{c}_{ba} \rightarrow \nabla_{a} \left( \nabla_{b} v^{c} \right) \tag{ex-0205.101}$$

$$v^{c}_{ba} \rightarrow \partial_{a} \left( \nabla_{b} v^{c} \right) + \Gamma^{c}_{da} \nabla_{b} v^{d} - \Gamma^{d}_{ba} \nabla_{d} v^{c} \tag{ex-0205.102}$$

$$v^{c}_{ba} \rightarrow \partial_{a} \left( \partial_{b} v^{c} + \Gamma^{c}_{db} v^{d} \right) + \Gamma^{c}_{da} \left( \partial_{b} v^{d} + \Gamma^{d}_{eb} v^{e} \right) - \Gamma^{d}_{ba} \left( \partial_{d} v^{c} + \Gamma^{c}_{ed} v^{e} \right) \tag{ex-0205.102}$$

$$v^{c}_{ba} \rightarrow \partial_{ab} v^{c} + \partial_{a} \left( \Gamma^{c}_{db} v^{d} \right) + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \Gamma^{d}_{eb} v^{e} - \Gamma^{d}_{ba} \partial_{d} v^{c} - \Gamma^{d}_{ba} \Gamma^{c}_{ed} v^{e} \tag{ex-0205.104}$$

$$v^{c}_{ba} \rightarrow \partial_{ab} v^{c} + \partial_{a} \Gamma^{c}_{db} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \Gamma^{d}_{eb} v^{e} - \Gamma^{d}_{ba} \partial_{d} v^{c} - \Gamma^{d}_{ba} \Gamma^{c}_{ed} v^{e} \tag{ex-0205.105}$$

$$v^{c}_{ba} \rightarrow \partial_{ab} v^{c} + \partial_{a} \Gamma^{c}_{db} v^{d} + \Gamma^{c}_{db} \partial_{a} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \Gamma^{d}_{eb} v^{e} - \Gamma^{d}_{ba} \partial_{d} v^{c} - \Gamma^{c}_{de} \Gamma^{e}_{ba} v^{d} \tag{ex-0205.107}$$

$$\nabla_{a} \left( \nabla_{b} v^{c} \right) \rightarrow \partial_{ab} v^{c} + \partial_{a} \Gamma^{c}_{db} v^{d} + \Gamma^{c}_{db} \partial_{a} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} + \Gamma^{c}_{da} \partial_{b} v^{d} - \Gamma^{c}_{de} \Gamma^{e}_{ba} v^{e} - \Gamma^{d}_{ba} \partial_{d} v^{c} - \Gamma^{c}_{de} \Gamma^{e}_{ba} v^{d} \tag{ex-0205.108}$$
